## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 and 18-29, drawn to a performance output device, classified in class 709, subclass 246.
  - II. Claim 13-17 and 30-32, drawn to storage medium for performance reproduction device, classified in class 709, subclass 246.
2. Inventions I; performance output device and II; storage medium are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a performance can be outputted without the need for a storage medium. The subcombination has separate utility such as a storage medium can be used to store an array of information for different systems.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to and message left with Benjamin S. Lee on September 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
